

QuikFlex Goal Instruction

1. Place goal on the ground. Open both sides from the centre hinge until they lock into place (fig A).
2. Open each corner hinge until they lock into place (fig B).
3. Extend the back frame of each side by pulling corners until they pop into place (fig C).

Note: For the 2m x 1m Goal, the velcro needs to be undone to see the lock pin.

4. Thread webbing loop over front angled tube as shown in fig D.
5. Join poles for 3m x 2m & 5m x 2m goal (fig E). Note: Not required for 2m x 1m goal. Insert poles into rear angled tubes (fig F).
6. Thread two remaining poles through sleeves (fig G) and insert into front angled tubes.
7. Place the white loops over the grooves of each pole (fig H). Start with front poles followed by rear poles.
8. Secure your goal into the ground by inserting the pegs over the goal base frame and into the ground.
